PROFESSIONAL SUMMARY

Backend engineer specializing in automation systems, scalable data pipelines, and AI-powered integrations. Experienced in owning projects end-to-end, from technical design and architecture through to production delivery. Proven ability to design APIs, build distributed backend systems, and integrate complex third-party platforms, with a strong focus on code quality, performance, and scalability

WORK EXPERIENCE

Software Developer | **Journeyz** | Tel Aviv, Israel *Aug 2024 – Present*

- Designed and built scalable backend data pipelines ingesting algorithm-generated insights into Google Cloud Spanner, owning the full architecture from technical design to production deployment.
- Engineered a distributed automation system integrating Salesforce, HubSpot, and Vitaly, designing the APIs and abstractions that synchronize client data across platforms in real time.
- Built and deployed a production AI agent using Google ADK and Google Agent Engine, enabling clients to access and query their data through natural language interfaces.
- Implemented MCP (Model Context Protocol) to connect the agent with internal systems, enabling seamless and secure integration across the company's data infrastructure.
- Leveraged AI coding tools including GitHub Copilot and Claude Code throughout development, accelerating delivery across all engineering work.

Data & Integrations Intern | **Stork** | Remote *Jan 2024 – Jul 2024*

- Optimized supplier-to-vendor data integrations via Feedonomics, reducing pipeline errors and improving data flow efficiency across product categories.
- Standardized supplier data mappings across integration pipelines, achieving consistent item values and significantly cutting manual rework.

MVP Developer Intern | **Researchpreneurs** | Berlin, Germany *Aug – Sep 2023*

- Delivered a working MVP using FlutterFlow and AI-based tooling, enabling the startup to demo to investors ahead of schedule within Reichman University's Global CO-OP program.

EDUCATION

B.Sc. Computer Science & Entrepreneurship (Double Major) | **Reichman University** • *Oct 2021 – Jul 2024*

- Capstone – PodcastGPT:** Architected an API generating full podcasts from a single topic input; integrated TTS, text-to-music, RAG, embeddings, FastAPI, Docker, and Azure CI/CD via GitHub Actions.
- 1st Place – Dev Club Competition:** Built a React + Flask + MongoDB full-stack app where users guess NBA players based on career paths and hints; defeated all competing teams.

MILITARY SERVICE

Cyber Defence Analyst | **Israel Defense Forces – ICT Corps** | Camp Ariel Sharon *Nov 2020 – Jan 2021*

- Completed intensive 2-month cyber analyst certification recognized by Israel's National Cyber Directorate.

Naval Commander (Attack Technician) | **IDF Navy** | Haifa, Israel *Apr 2018 – Nov 2020*

- Led multiple professional training courses as a commander at the Naval Training Base after active service aboard a missile ship, instructing naval recruits through basic and advanced programs.

SKILLS & LANGUAGES

Languages: Python, JavaScript, Java, SQL, C, C#, HTML/CSS

Frameworks: React, FastAPI, Flask, Pydantic

Cloud & DevOps: Microsoft Azure, Google Cloud Spanner, Docker, GitHub Actions

Integrations: Salesforce, HubSpot, Vitaly, Feedonomics, Slack API

AI & Agents: Google ADK, Google Agent Engine, MCP (Model Context Protocol), Claude Code, RAG, Embeddings, OpenAI API, Anthropic API

Human Languages: English (native), Hebrew (native)
